Executive Summary

Vision Statement Block

Promise Mining

BTX is the digital asset mined through users' contribution and promise fulfillment activities.

The value of the ecosystem is proven by users' trust activities, and in return for this proof, the asset (BTX) is issued.

Key Metrics & Token Highlights

CURRENT SCALE

270,000
Active Members

1,000,000
Primary Target

TOKEN HIGHLIGHTS

- Total Supply **1 Trillion BTX**
- Network **Globy Mainnet**
- Operator **BTX Foundation**

The Problem with Today's Reward Systems

01

Fragmented Reward Ecosystems

Each platform operates a separate point system
— users cannot consolidate or utilize rewards across platforms.

02

Limited Reward Portability

Closed-loop rewards usable only within specific platforms
— cross-ecosystem transfer and exchange is impossible.

03

Poor Monetization Flexibility

No effective means to realize the actual economic value of points — user engagement motivation diminishes.

04

Isolated Commerce Engagement

No connectivity between advertising, shopping, and commerce — a unified user experience is absent.

— The result: user trust erodes, engagement drops, and reward value is lost.

The BTX Ecosystem Solution

Your Activity IS the Mining.

01

Unified Reward Utility

- All platform rewards unified into a single BTX token
- Ad participation, store operation, and keyword ownership
- all consolidated into BTX

Single Token · All Rewards

02

BTX Mining Mechanism

- User promise fulfillment = Mining Energy
- Ad viewing · Store operation · Keyword ownership → BTX minted

Your Activity IS the Mining

Activity → Energy → BTX

03

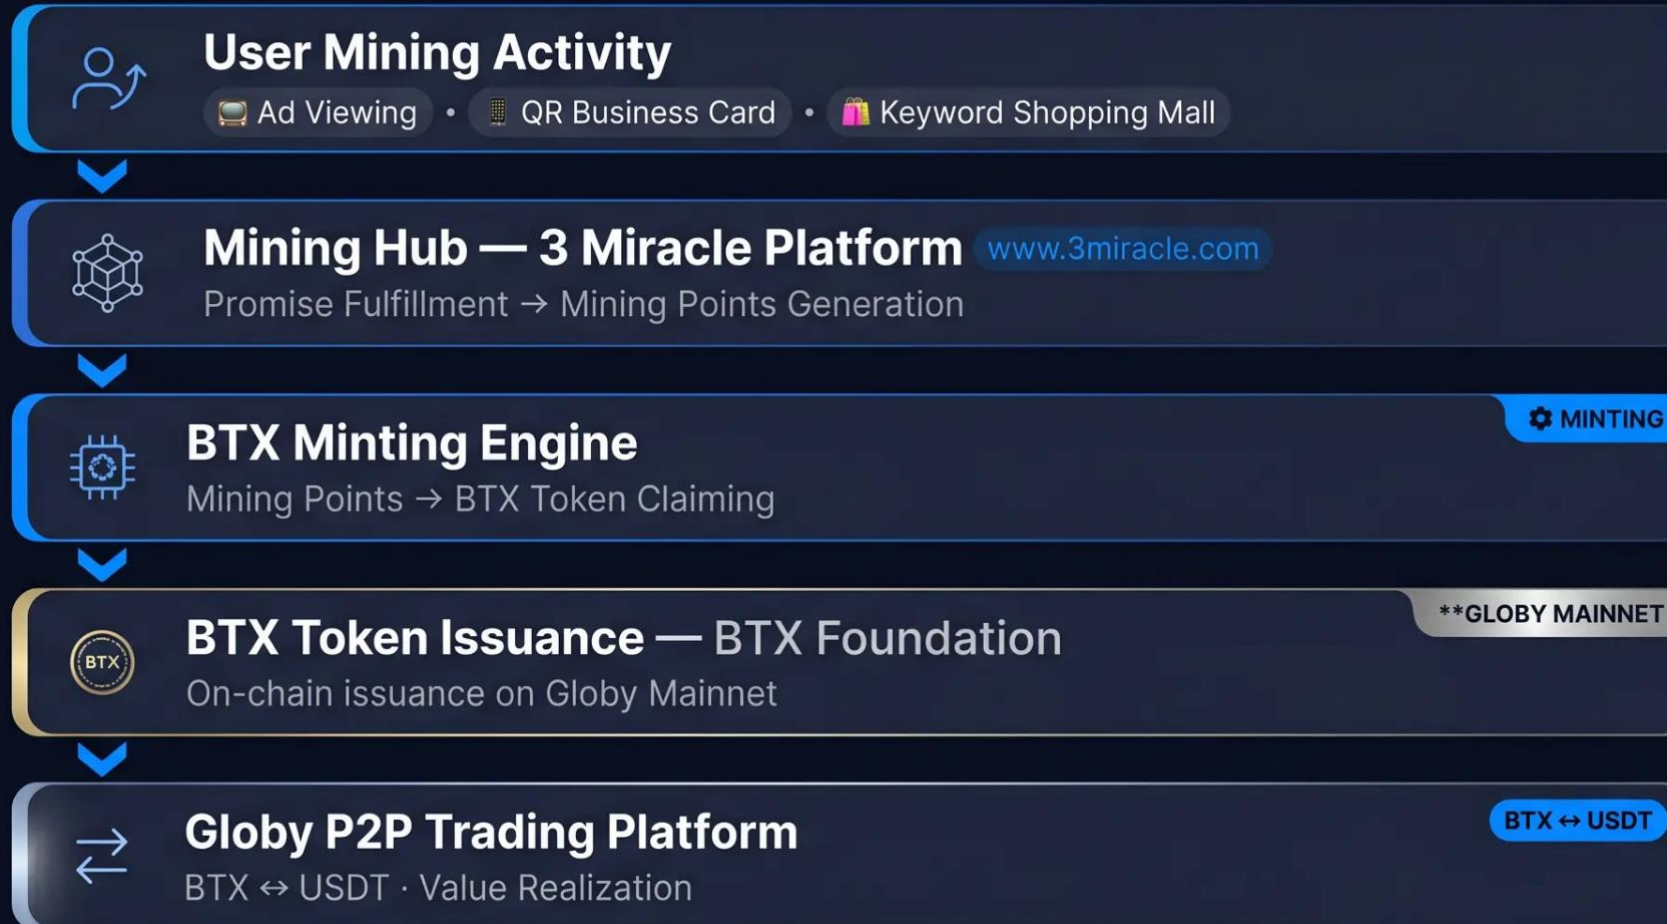

Scalable Platform Economy

- Infrastructure designed for 1M-2M+ active miners
- Enterprise-grade cloud scalability for global reach

1M → 2M+ Miners

Ecosystem Architecture

*From user activity to BTX issuance — one unified Mining Pipeline

Platform Features & Mining Nodes

NODE 01

Advertising Mining Node

Ad viewing participation generates basic mining activity – the foundational hashrate of the BTX ecosystem.

NODE 02

Commerce Mining Node

Operating a personal shopping mall is an advanced mining participation that increases overall mining efficiency.

NODE 03

Keyword Mining Right

Keyword ownership secures a dedicated mining zone – regional, national, and city-level mining territory rights.

“Keyword ownership is the most powerful means of securing mining rights.”

NODE 04

QR Mining Channel

Network expansion via QR business cards expands mining range – linked directly to the 3 Miracle Platform.

www.3miracle.com

NODE 05

Ecosystem Mining Pool

Community participation maximizes collective mining efficiency – the network effect amplifies every miner's output.

BTX Token Overview

ACTIVITY MINING

Digital Asset Mined by User Commitment

Token Name	BTX
Blockchain Network	Globy Mainnet
Contract Address	0x6d27E1eC9919d08650C10342adAe9bCBA1bf8720
Total Supply	1,000,000,000,000 BTX
Foundation	BTX Foundation
Utility Purpose	Settlement and exchange asset for the integrated reward commerce ecosystem

BTX Foundation GOVERNANCE — Independent Token Issuance & Management
www.3miracle.com

Issued on Globy Mainnet
Governed by BTX Foundation

Token Utility & Virtuous Cycle

Mined BTX creates a virtuous cycle of reinvestment, payment, and value storage within the ecosystem.

MINING GROWTH & SCALE

Mining Infrastructure Scalability

From 270K active miners to a 2M+ global mining network – built to scale.

Cloud Mining Backend

Enterprise-grade cloud infrastructure. High availability and resilience by design.

Auto Scaling

Elastic architecture that automatically expands with hashpower demand growth.

Global Multi-Region

Multi-region mining node expansion planned to support worldwide mining services.

Enterprise-Grade Security

Security, stability, and performance infrastructure built for global mining operations.

Governance & Compliance

Three pillars of independent governance, legal clarity, and operational integrity.

BTX Foundation Governance 01

- BTX token issuance and management handled independently by BTX Foundation
- Transparent foundation governance structure

Legal Separation Structure 02

- Platform operator and BTX Foundation are legally independent entities
- Regulatory risk minimized through structural separation
- Partnership maintained through contractual agreements

Ecosystem Operational Integrity 03

- Service cooperation based on contractual partnership
- Transparent operational principles and stakeholder protection
- Flexible governance responsive to evolving global regulatory environments

[Platform Operator] ——— [BTX Foundation]

Contractual Partnership · Legally Separated

STRATEGIC TIMELINE

Development Roadmap

From Infrastructure to Global Expansion

Now: 270,000 Miners

Target: 2,000,000+ Miners

Risk Disclosure

Please read carefully before participating in the BTX ecosystem.

01 · NO GUARANTEED RETURNS

BTX does not guarantee any appreciation in token value or specific financial returns. Mining rewards may vary depending on user activity levels and market conditions.

02 · MARKET VOLATILITY

The cryptocurrency market carries high volatility. Token value may fluctuate based on prevailing market conditions.

03 · REGULATORY UNCERTAINTY

Cryptocurrency regulations vary by jurisdiction and are subject to change. Associated compliance risks exist across different markets.

04 · UTILITY TOKEN NOTICE

BTX is a utility token, not a security or investment product. This whitepaper does not constitute investment advice. Conduct thorough due diligence before participation.

This document is not investment advice. Please conduct thorough due diligence before participation. BTX is a utility token.
